Frequently Asked Questions

How long does shipping from China take?

Air freight: 5–10 business days. Sea freight: 25–45 calendar days. Rail freight: 18–28 days to Europe. All under DDP terms including customs clearance.

What is DDP shipping?

Delivered Duty Paid — all costs are included: freight, customs duties, import taxes, and last-mile delivery to your door. No charges at the destination port.

Is there a minimum shipment size?

Air freight channels typically require a minimum of 21 KG. Sea freight starts from 1 CBM. Express courier handles single parcels. Contact us to confirm options for your specific cargo.

Do you handle batteries and special cargo?

Yes — we have dedicated channels for battery goods, brand cargo, and other regulated items. Surcharges apply and certification documents are required.

How do I pay for shipping?

Rates are quoted and invoiced in USD. Payment is required before shipment departure via bank transfer (T/T) or other agreed methods.

Get a real price, not a range

Tell us the weight, the carton count and where it is going. That is everything a carrier needs — give us those and we can price your cargo the same day, on your preferred trade term.
