China → Samalaju · via BTU air / Samalaju sea · clearance by Royal Malaysian Customs Department (JKDM)

Cargo handling on the China-Samalaju lane.

For buyers shipping into Samalaju, the practical question is not the ocean or flight time but what happens after arrival. Samalaju is Sarawak heavy-industry park port; cargo enters through BTU air / Samalaju sea, and allow +1 day for the inland leg on top of clearance.

The clearing authority is Royal Malaysian Customs Department (JKDM). Historical dwell on this gateway is around 2-4 days, and it lengthens in Sep-Nov.

Duty, tax and clearance into Samalaju

Royal Malaysian Customs Department (JKDM) assesses duty and tax on cargo arriving for Samalaju consignees. Current regime: Sales tax 5–10% plus 10% low-value-goods tax on online orders under MYR 500; duty 0–30%, largely 0% under ACFTA, with a de-minimis position of MYR 500 (low-value goods sold online are taxed regardless).

Conformity is the part most first-time importers underestimate: SIRIM certification and MCMC label for electrical and radio products; halal certification for food ingredients. Getting this wrong is expensive because it usually cannot be fixed after the cargo has landed.

Restrictions and known friction points for Malaysia: Electrical goods without a SIRIM label are routinely detained. Alcohol, e-cigarettes and vape liquid are restricted. Direct-to-consumer parcels are subject to the low-value goods tax collected at the point of sale.

What the routing looks like in practice

Peninsular Malaysia is served through Port Klang and Tanjung Pelepas with very frequent South China sailings. East Malaysia (Sarawak and Sabah) is a separate customs territory in practice — cargo transships at Klang or Singapore and adds 5–8 days plus a second clearance step, so quote Kuching and Kota Kinabalu separately.

Air gateways used	KUL (Kuala Lumpur), PEN (Penang), BKI (Kota Kinabalu)
Air transit, China to gateway	3–5 business days
Gateway serving Samalaju	BTU air / Samalaju sea
Inland leg to Samalaju	+1 day from the gateway
Typical clearance / dwell	2–4 days
Peak season to plan around	Sep–Nov

Handling on the BTU air / Samalaju sea routing serving Samalaju.

Pre-shipment checklist for Samalaju

- Book earlier than the transit time suggests during Sep-Nov, when space on this lane tightens.
- Compare gross weight against volumetric weight ($L \times W \times H \div 6000$) — the higher figure is what gets billed on air and express.
- Confirm the consignee in Samalaju can act as importer of record — Royal Malaysian Customs Department (JKDM) will not release cargo to an unregistered party.
- Plan around the China-side windows too: Chinese New Year and Golden Week both compress capacity on the Malaysia lane.
- Put the Samalaju delivery address, contact name and phone number on the invoice, not just the packing list.
- Declare lithium batteries, magnets, liquids and powders up front — retro-declaring after booking usually means re-planning the whole shipment.

Frequently asked questions

How long does shipping from China to Samalaju take?

China to the Malaysia gateway is 3-5 business days. On top of that, allow 2-4 days of clearance with Royal Malaysian Customs Department (JKDM) and a +1 day inland leg to Samalaju.

What duty and tax will I pay importing into Samalaju?

Royal Malaysian Customs Department (JKDM) applies: Sales tax 5-10% plus 10% low-value-goods tax on online orders under MYR 500; duty 0-30%, largely 0% under ACFTA. The de-minimis position is MYR 500 (low-value goods sold online are taxed regardless). Under a DDP arrangement these are pre-paid, so nothing is collected on arrival in Samalaju.

Which port or airport does cargo for Samalaju clear through?

Cargo for Samalaju is routed via BTU air / Samalaju sea. Sea gateways for Malaysia are Port Klang, Tanjung Pelepas, Penang; air gateways are KUL (Kuala Lumpur), PEN (Penang), BKI (Kota Kinabalu). We pick whichever gives the shortest total door time for your address.

Can you ship batteries or sensitive cargo to Samalaju?

Yes. Battery cargo by air follows IATA PI 965-970 depending on how the cells are packed, and moves on certified channels via KUL (Kuala Lumpur), PEN (Penang), BKI (Kota Kinabalu). Surcharges apply and the declaration has to be made before booking.

What documents does Royal Malaysian Customs Department (JKDM) require?

A commercial invoice with HS codes, a packing list, the bill of lading or air waybill, a certificate of origin where it lowers duty, and any product certification (SIRIM certification and MCMC label for electrical and radio products; halal certification for food ingredients). We prepare and file these as part of the service.

How is the chargeable weight calculated for Samalaju?

We compare actual gross weight against volumetric weight — length × width × height in centimetres divided by 6000 for air — and bill the greater of the two, rounded up to the next kilogram. Light, bulky cargo is almost always billed on volume.

 Cargo Weight (KG)

☐ Enter the actual gross weight of your shipment in kilograms. If you're unsure, fill in the volume fields below and we'll calculate it for you.

☐ Or enter volume (cm) — volumetric weight ÷ 6000

× ×

Non-integers rounded up. Larger of actual vs volumetric is used.

☐ Number of Boxes

Total chargeable weight = weight per box × number of boxes.

 When you have not filled in the volume information, our prices may be inaccurate.
