→ Air Freight

China → Sandakan · via SDK air / Sandakan sea · clearance by Royal Malaysian Customs Department (JKDM)

Cargo handling on the China-Sandakan lane.

Freight from China into Sandakan clears through SDK air / Sandakan sea. Sandakan is east Sabah commercial port, and allow +1 day for the inland leg on top of clearance.

The clearing authority is Royal Malaysian Customs Department (JKDM). Historical dwell on this gateway is around 2-4 days, and it lengthens in Sep-Nov.

Routing and transit on this lane

Peninsular Malaysia is served through Port Klang and Tanjung Pelepas with very frequent South China sailings. East Malaysia (Sarawak and Sabah) is a separate customs territory in practice — cargo transships at Klang or Singapore and adds 5–8 days plus a second clearance step, so quote Kuching and Kota Kinabalu separately.

Air gateways used	KUL (Kuala Lumpur), PEN (Penang), BKI (Kota Kinabalu)
Air transit, China to gateway	3–5 business days
Gateway serving Sandakan	SDK air / Sandakan sea
Inland leg to Sandakan	+1 day from the gateway
Typical clearance / dwell	2–4 days
Peak season to plan around	Sep–Nov

What you will pay on arrival in Malaysia

Imports into Malaysia are cleared by Royal Malaysian Customs Department (JKDM). The headline position is: Sales tax 5–10% plus 10% low-value-goods tax on online orders under MYR 500; duty 0–30%, largely 0% under ACFTA. The de-minimis threshold is MYR 500 (low-value goods sold online are taxed regardless).

Conformity is the part most first-time importers underestimate: SIRIM certification and MCMC label for electrical and radio products; halal certification for food ingredients. Getting this wrong is expensive because it usually cannot be fixed after the cargo has landed.

Restrictions and known friction points for Malaysia: Electrical goods without a SIRIM label are routinely detained. Alcohol, e-cigarettes and vape liquid are restricted. Direct-to-consumer parcels are subject to the low-value goods tax collected at the point of sale.

Handling on the SDK air / Sandakan sea routing serving Sandakan.

Pre-shipment checklist for Sandakan

- Check the de-minimis position (MYR 500 (low-value goods sold online are taxed regardless)) against your invoice value before you decide how to split the shipment.
- Compare gross weight against volumetric weight ($L \times W \times H \div 6000$) — the higher figure is what gets billed on air and express.
- Ask for the HS code in writing from your supplier and verify the Malaysia duty rate against it yourself.
- Declare lithium batteries, magnets, liquids and powders up front — retro-declaring after booking usually means re-planning the whole shipment.
- Plan around the China-side windows too: Chinese New Year and Golden Week both compress capacity on the Malaysia lane.
- Photograph carton markings and seal numbers before departure — it makes any claim far easier to settle.

Frequently asked questions

How long does shipping from China to Sandakan take?

China to the Malaysia gateway is 3–5 business days. On top of that, allow 2–4 days of clearance with Royal Malaysian Customs Department (JKDM) and a +1 day inland leg to Sandakan.

What duty and tax will I pay importing into Sandakan?

Royal Malaysian Customs Department (JKDM) applies: Sales tax 5–10% plus 10% low-value-goods tax on online orders under MYR 500; duty 0–30%, largely 0% under ACFTA. The de-minimis position is MYR 500 (low-value goods sold online are taxed regardless). Under a DDP arrangement these are pre-paid, so nothing is collected on arrival in Sandakan.

What documents does Royal Malaysian Customs Department (JKDM) require?

A commercial invoice with HS codes, a packing list, the bill of lading or air waybill, a certificate of origin where it lowers duty, and any product certification (SIRIM certification and MCMC label for electrical and radio products; halal certification for food ingredients). We prepare and file these as part of the service.

When is the busiest time on the China–Malaysia lane?

Space and rates tighten around Sep–Nov, plus the China-side windows of Chinese New Year in January or February and Golden Week in early October. Book one to two weeks earlier in those periods.

How is the chargeable weight calculated for Sandakan?

We compare actual gross weight against volumetric weight — length × width × height in centimetres divided by 6000 for air — and bill the greater of the two, rounded up to the next kilogram. Light, bulky cargo is almost always billed on volume.

Is sea freight cheaper than air freight into Sandakan?

Per kilo, yes — usually by a wide margin. The trade-off is time: 5–9 calendar days by sea versus 3–5 business days by air to the Malaysia gateway, before clearance and the +1 day inland leg. The crossover point is normally somewhere between 100 and 300 kg depending on the density of your cargo.

☐ Cargo Weight (KG)

☐ Enter the actual gross weight of your shipment in kilograms. If you're unsure, fill in the volume fields below and we'll calculate it for you.

☐ Or enter volume (cm) — volumetric weight ÷ 6000

× ×

Non-integers rounded up. Larger of actual vs volumetric is used.

☐ Number of Boxes

Total chargeable weight = weight per box × number of boxes.

☐ When you have not filled in the volume information, our prices may be inaccurate.
