China → Sibu · via SBW air / Sibu sea · clearance by Royal Malaysian Customs Department (JKDM)

Cargo handling on the China-Sibu lane.

Sibu is Rajang river port in central Sarawak, and it is served through SBW air / Sibu sea. That combination is what actually sets your delivery date on this lane — allow +1 day for the inland leg on top of clearance.

On the destination side, Royal Malaysian Customs Department (JKDM) handles clearance; budget 2-4 days of dwell before the cargo is released.

How this lane actually runs

Peninsular Malaysia is served through Port Klang and Tanjung Pelepas with very frequent South China sailings. East Malaysia (Sarawak and Sabah) is a separate customs territory in practice — cargo transships at Klang or Singapore and adds 5–8 days plus a second clearance step, so quote Kuching and Kota Kinabalu separately.

Air gateways used	KUL (Kuala Lumpur), PEN (Penang), BKI (Kota Kinabalu)
Air transit, China to gateway	3–5 business days
Sea gateways used	Port Klang, Tanjung Pelepas, Penang
Sea transit, China to gateway	5–9 calendar days
Gateway serving Sibu	SBW air / Sibu sea
Inland leg to Sibu	+1 day from the gateway
Typical clearance / dwell	2–4 days
Peak season to plan around	Sep–Nov

What you will pay on arrival in Malaysia

Royal Malaysian Customs Department (JKDM) assesses duty and tax on cargo arriving for Sibu consignees. Current regime: Sales tax 5–10% plus 10% low-value-goods tax on online orders under MYR 500; duty 0–30%, largely 0% under ACFTA, with a de-minimis position of MYR 500 (low-value goods sold online are taxed regardless).

Conformity is the part most first-time importers underestimate: SIRIM certification and MCMC label for electrical and radio products; halal certification for food ingredients. Getting this wrong is expensive because it usually cannot be fixed after the cargo has landed.

Restrictions and known friction points for Malaysia: Electrical goods without a SIRIM label are routinely detained. Alcohol, e-cigarettes and vape liquid are restricted. Direct-to-consumer parcels are subject to the low-value goods tax collected at the point of sale.

Handling on the SBW air / Sibü sea routing serving Sibü.

Air, sea or overland into Sibü?

Mode	Transit to gateway	Best suited to
✈ Air Freight	3–5 business days	time-critical, high-value and low-volume cargo
🚢 Sea Freight	5–9 calendar days	volume cargo where cost per kilo matters more than speed

Transit shown is China departure to the Malaysia gateway and excludes the +1 day inland leg to Sibü and 2–4 days of clearance.

Before you book: Sibü checklist

- Declare lithium batteries, magnets, liquids and powders up front — retro-declaring after booking usually means re-planning the whole shipment.
- Budget for the inland leg: +1 day beyond gateway clearance to reach Sibü.
- Compare gross weight against volumetric weight ($L \times W \times H \div 6000$) — the higher figure is what gets billed on air and express.
- Use ISPM-15 treated pallets. Untreated wood is the most common reason otherwise-clean cargo gets held.
- Check the de-minimis position (MYR 500 (low-value goods sold online are taxed regardless)) against your invoice value before you decide how to split the shipment.
- Photograph carton markings and seal numbers before departure — it makes any claim far easier to settle.

Frequently asked questions

How long does shipping from China to Sibu take?

China to the Malaysia gateway is 3–5 business days by air, 5–9 calendar days by sea. On top of that, allow 2–4 days of clearance with Royal Malaysian Customs Department (JKDM) and a +1 day inland leg to Sibu.

What duty and tax will I pay importing into Sibu?

Royal Malaysian Customs Department (JKDM) applies: Sales tax 5–10% plus 10% low-value-goods tax on online orders under MYR 500; duty 0–30%, largely 0% under ACFTA. The de-minimis position is MYR 500 (low-value goods sold online are taxed regardless). Under a DDP arrangement these are pre-paid, so nothing is collected on arrival in Sibu.

What documents does Royal Malaysian Customs Department (JKDM) require?

A commercial invoice with HS codes, a packing list, the bill of lading or air waybill, a certificate of origin where it lowers duty, and any product certification (SIRIM certification and MCMC label for electrical and radio products; halal certification for food ingredients). We prepare and file these as part of the service.

Can you ship batteries or sensitive cargo to Sibu?

Yes. Battery cargo by air follows IATA PI 965–970 depending on how the cells are packed, and moves on certified channels via KUL (Kuala Lumpur), PEN (Penang), BKI (Kota Kinabalu). Surcharges apply and the declaration has to be made before booking.

When is the busiest time on the China–Malaysia lane?

Space and rates tighten around Sep–Nov, plus the China-side windows of Chinese New Year in January or February and Golden Week in early October. Book one to two weeks earlier in those periods.

Is sea freight cheaper than air freight into Sibu?

Per kilo, yes — usually by a wide margin. The trade-off is time: 5–9 calendar days by sea versus 3–5 business days by air to the Malaysia gateway, before clearance and the +1 day inland leg. The crossover point is normally somewhere between 100 and 300 kg depending on the density of your cargo.

 Cargo Weight (KG)

☐ Enter the actual gross weight of your shipment in kilograms. If you're unsure, fill in the volume fields below and we'll calculate it for you.

☐ Or enter volume (cm) — volumetric weight ÷ 6000

× ×

Non-integers rounded up. Larger of actual vs volumetric is used.

☐ Number of Boxes

Total chargeable weight = weight per box × number of boxes.

 When you have not filled in the volume information, our prices may be inaccurate.
